

Galvanized Steel Nut and Bolt Set

This set includes bolts with rounded heads and corresponding square nuts. All components feature a galvanized coating for corrosion resistance and enhanced longevity.

Product Overview

Industrial Fastener Solution

This galvanized steel nut and bolt set is engineered for robust performance in machinery and diverse industrial applications. Featuring a protective galvanized coating, these fasteners are specifically designed to resist corrosion, ensuring long-term reliability and structural integrity in demanding environments. The set includes precision-engineered bolts with rounded heads paired with corresponding square nuts for secure, durable connections.

Technical Specifications

Corrosion Resistance

Galvanized Coating • Weather Resistant

Included Components

- Rounded head bolts
- Square nuts

Material

Galvanized Steel

Application Suitability

Primary Applications

Machinery, Industrial Assemblies, Mechanical Construction
