

Galvanized Steel Roll Container with Adjustable Shelves

This roll container facilitates the movement of goods in various industries. It is suitable for use in food service, textile, and other sectors, with a galvanized and powder-coated finish.

Product Overview

Versatile Logistics Solution

This galvanized steel roll container is a robust, mobile storage and transport unit designed to streamline logistics in supermarkets, warehouses, and industrial settings. It features an adjustable shelving system to accommodate varying product sizes, ensuring safety and organization during transit. With its collapsible design and high load capacity, it offers maximum flexibility for seasonal fluctuations and efficient inventory management.

Technical Specifications

Weight Capacity

300 kg

Maximum Load

Wheel Setup

- 2 Directional Wheels
- 2 Universal Wheels

Surface Treatment

Galvanized, Powder Coated

Application & Features

Ideal Industries

Service Industry • Food Industry • Textile Sector • Retail • Logistics

Operational Advantages

- Collapsible design for space-saving storage
- Adjustable shelving for flexible configuration
- Protects sensitive goods during transport
- Facilitates efficient loading and unloading
- Custom design options available based on usage
