

# Galvanized Steel U-Shackle for Overhead Power Transmission

This U-shackle is designed for electric power transmission and distribution applications. It is made from high-strength steel and features a bolt and nut closure system for secure connections.

## Product Overview

### Professional U-Shackle for Power Transmission

This high-strength galvanized steel U-shackle is engineered specifically for overhead power transmission and distribution projects. Featuring a robust bolt and nut closure system, it ensures secure and reliable load-bearing performance in critical infrastructure. The design incorporates a durable hot-dip galvanized finish to withstand harsh environmental conditions, paired with stainless steel cotter pins for enhanced corrosion resistance.

## Technical Specifications

### Material Composition

Component	Material
Main Body	Hot-dip galvanized steel
Closure System	Hot-dip galvanized steel
Cotter Pin	Stainless steel

### Product Markings

HOGN, 6.8, TD

## Applications

### Primary Applications

- Overhead power line construction
- Substation equipment mounting
- General industrial rigging
