

Galvanized Steel Wire Rope Thimble

These U.S. Type Standard Thimbles safeguard wire rope or cable eyes against wear and deformation. They fit inside the loop of a cable, providing a solid, abrasion-resistant surface.

Product Overview

U.S. Type Standard Thimble

These U.S. Type Standard Thimbles are designed to protect wire rope or cable eyes from wear and deformation by providing a solid, abrasion-resistant surface. They are essential for maintaining the integrity and strength of cable terminations in various rigging, lifting, and marine applications. Constructed from durable iron or stainless steel, these components ensure long-lasting performance and reliability.

Physical Specifications

Surface Treatment

Zinc Plated • Stainless Steel

Material Options

Iron, Stainless Steel

Available Sizes

1/8" to 2 1/2"
