

# Galvanized Steel Wire Rope Thimble DIN6899 Type B

This galvanized steel thimble conforms to DIN6899 B Type standards and protects wire rope or cable eyes from wear and deformation. It provides a durable and reliable termination point for rigging and lifting applications.

## Product Overview

### Galvanized Steel Wire Rope Thimble

This DIN 6899 Type B thimble is engineered to protect wire rope or cable eyes from wear, deformation, and crushing. Featuring electrolytic galvanization, it offers superior corrosion resistance for reliable performance in harsh environments. It serves as an essential component for secure rigging and lifting applications, ensuring the longevity and integrity of your cable terminations.

## Technical Specifications

### Finish

Electrolytic Galvanized

### Key Features

- Prevents cable crushing
- Protects against wear and deformation
- Enhanced corrosion resistance
- Suitable for rigging and lifting

### Standard

DIN 6899

### Type

B
