

# Gantry Type Milling Machine

This heavy-duty machine tool is designed for machining large workpieces with high precision. It features multiple axes of movement, including linear and rotary axes, enabling complex machining operations.

## Overview

### Heavy-Duty Gantry Milling Solution

This gantry-type milling machine is engineered for high-precision machining of large and heavy workpieces. Featuring a robust, rigid frame design, it ensures stability during demanding material removal processes. Equipped with multi-axis movement capabilities and integrated coolant systems, this machine is an ideal choice for industrial applications requiring complex, high-accuracy operations.

## Technical Specifications

### Performance Metrics

**1 Large Workpieces**

Machining Capability

**1 Integrated**

Coolant System

### Axis Configuration

- Linear Axes
- Rotary Axes

### Machine Type

Gantry Type Milling Machine

### Key Features

Heavy-Duty, Multi-Axis, High-Precision, Rigid Frame
