Overview

Heavy-Duty Gap Bed Lathe

This heavy-duty gap bed lathe is engineered for precision metal cutting and versatile turning operations. It features a robust one-piece cast base and a 350mm wide V-bed that is hardened and precision ground for long-term durability. Designed for demanding machining tasks, it offers flexible control settings and a removable gap bed to accommodate larger workpiece diameters.

Technical Specifications

Spindle Speed Range

25 rpm

Minimum Speed

1600 rpm

Maximum Speed

Turning Diameters (Gap Bed)

- 735
- 785

Spindle Bore

80 mm

Spindle Speed Steps

12

V-Bed Width

350 mm

Features

Operational Controls

6-position long feed knockout • Adjustable parameters • Multiple speed settings

Construction Features

One-piece cast base, Hardened V-bed, Precision ground bed, Removable gap bed
