

Garden Waste Shredder

This cutting shredder is designed for efficient reduction of garden waste and other organic materials. It features a robust cutting mechanism for processing branches and foliage into manageable mulch.

Product Overview

Efficient Garden Waste Management

This high-quality cutting shredder is engineered for the efficient reduction of garden waste and organic materials. Designed with a robust cutting mechanism, it effectively processes branches and foliage into manageable mulch. Its user-friendly design includes wheels for easy maneuverability and a stable base for safe, consistent operation.

Key Features

Design Highlights

- Robust cutting mechanism
- Compact design for storage
- Integrated wheels for mobility
- Stable base for safe operation

Safety & Compliance

Safety Features

Protected power switch, Safe feed opening, Blade contact prevention

Performance

Performance Metrics

1 Organic/Branches

Material Suitability
