

Garlic Press Set with Stainless Steel and Plastic Options

This set includes two garlic presses constructed from different materials. One press is made of stainless steel, while the other is made of white plastic, both designed for efficient garlic crushing.

Product Overview

Professional Kitchen Garlic Press Set

This dual-option garlic press set provides professional chefs and home cooks with two distinct material choices for efficient garlic preparation. Featuring both a durable stainless steel model and a lightweight white plastic alternative, this set offers versatility for various culinary environments. Both tools are engineered with a lever-action pressing mechanism to ensure consistent results with minimal physical effort.
