Product Overview

Professional Grade Garnet Sand

This 30/60 mesh garnet sand is a high-performance abrasive media engineered for demanding industrial surface preparation. It offers excellent hardness and durability, ensuring efficient removal of rust, paint, and various coatings while maintaining a consistent blasting pattern. Designed for versatility, this media minimizes dust generation, promoting a cleaner and safer working environment across diverse applications.

Technical Specifications

Mesh Size	30/60
Applications	Sandblasting, Surface Preparation, Rust Removal, Paint Stripping, Coating Removal, Abrasive Cleaning
Compatible Materials	Metal, Wood, Concrete

Industry Usage

Primary Industries

- Shipbuilding
- Automotive
- Construction
- Marine
- Pipeline Anti-corrosion
- Aviation
- Granite Cutting
