

Gas Engine Generator Set

This gas engine generator set is designed for power generation. It features a multi-cylinder gas engine coupled with an electrical generator.

Product Overview

High-Efficiency Gas Engine Generator

The HND-CHG622V20 generator set is engineered for high efficiency, reliability, and compact design, making it suitable for a wide range of industrial power applications. It is compatible with diverse fuel sources including natural gas, coalbed methane, landfill gas, and biogas. Advanced control technologies, such as rarified combustion and intelligent ignition, ensure stable, economical operation while significantly reducing NOx emissions.

Technical Features

Combustion Control

- Rarified combustion control technology
- High energy intelligent ignition system
- Accurate air-fuel ratio control
- Real-time cylinder detonation monitoring

Control System Origin

Imported Components

Compatible Gas Sources

Natural Gas, Coalbed Methane, Landfill Gas, Biogas
