

Gas Fired Instantaneous Water Heater

This gas-fired instantaneous water heater provides hot water on demand. It features a copper heat exchanger with brazed fins and integrated flow regulators for consistent delivery.

Product Overview

High-Efficiency Instantaneous Heating

This gas-fired instantaneous water heater is engineered for on-demand hot water supply in both residential and commercial settings. It features a high-efficiency copper heat exchanger with brazed fins to optimize thermal transfer and ensure consistent performance. With an intelligent LED display and precise temperature adjustment, this unit balances energy savings with user-friendly operation, all while maintaining low NOx emissions for environmental compliance.

Technical Features

Heat Exchanger Construction

- Copper heat exchanger
- Brazed fins for optimal thermal transfer
- Parallel flow configuration
- Corrosion and scaling resistant design

Exhaust System

Forced Exhaust, Balanced Type (Optional)

Performance & Control

Operational Metrics

88 °C

Max Temperature

Control & Interface

- Intelligent LED display
- Easy temperature adjustment
- Auto mode
- Eco mode

Safety & Environment

Safety & Compliance

Multi-Safe Protection • Low NOx • Environmental Friendly
