

# Gas Generator Set for Power Generation

This gas generator set provides a reliable and efficient power generation solution. Designed for prime and standby applications, it features automatic voltage regulation, overload protection, and low oil shutdown.

## ADDITIONAL IMAGES

## Overview

### Reliable Power Generation Solution

This industrial-grade gas generator set is engineered for both prime and standby power applications, offering a dependable energy source for various operational needs. Designed with a robust engine and high-efficiency alternator, it ensures stable power output suitable for industrial, commercial, and residential environments. The unit features comprehensive monitoring capabilities and integrated safety systems, including automatic voltage regulation, overload protection, and critical shutdown protocols for long-term reliability.

## Technical Specifications

Fuel Heat Value Reference	35.8 MJ/Nm3
Compatible Fuel Types	Biogas, Natural Gas

## Key Features

### Integrated Safety Systems

- Automatic Voltage Regulation (AVR)
- Overload Protection
- Low Oil Shutdown
- Over-speed Protection
- High Temperature Shutdown

## Performance Metrics

### Operational Capabilities

**1 Prime/Standby**  
Application Type
