

Gas Powered Water Pump for Irrigation and Drainage

This gas-powered water pump is designed for efficient water transfer in various applications. Featuring a robust engine and durable pump housing, it delivers high flow rates and reliable performance.

Overview

High-Performance Gas-Powered Water Pump

This gas-powered water pump is engineered for efficient water transfer across diverse applications, including agricultural irrigation, construction site drainage, and emergency water removal. Featuring a robust engine and durable pump housing, it delivers consistent high flow rates and reliable performance. The unit is self-priming and designed for ease of operation, supported by a sturdy frame that ensures both portability and stability during demanding tasks.

Key Performance Metrics

Maximum Flow Rate

160 GPM

Flow Rate

Maximum Head

90 ft

Max Head

Technical Specifications

Model Number	WP20-25
Inlet/Outlet Diameter	2 inches
Fuel Tank Capacity	3.6 L

Features

Design Highlights

- Self-priming pump design
- Durable pump housing
- Sturdy frame for portability
- Robust engine construction

Ideal Applications

Irrigation, Drainage, Construction, Emergency Water Removal
