

Gasoline Concrete Cut-Off Saw

This gasoline-powered concrete cut-off saw is designed for cutting concrete, asphalt and other hard materials. It has a super rigid frame structure to ensure flat reduction, resistance to warping, and vibration, prolonging the service life of the saw blade.

Product Overview

Professional Concrete Cutting Solution

This heavy-duty concrete cut-off saw features a robust frame designed for precision cutting of concrete pavement expansion joints, marble, and granite. Built for road engineering and construction, the unit incorporates an adjustable handle and crank-operated depth control to ensure ergonomic operation. Its integrated water cooling system and rigid design minimize vibration, prolonging blade life and ensuring clean, flat cuts.

Technical Specifications

Rotation Speed

2200 r/min
Speed

Engine Type	Diesel engine
Maximum Cutting Depth	270 mm
Blade Diameter Range	400-700mm

Key Features

Features List

- Super rigid frame structure for vibration resistance
- Ergonomic design with adjustable handle height
- Crank-adjustable cutting depth
- Stainless steel water tank for cooling
- Engineered for extended blade service life

Product Application

Suitable Applications	Highway Cutting, Bridge Construction, Asphalt Pavement, Concrete Pavement, Stone Cutting
