

Gasoline Dispenser Pump

This pump is specifically designed for dispensing gasoline. It ensures accurate and reliable fuel delivery.

Product Overview

Versatile Thermal Tool

This professional-grade heat gun is designed for a wide range of industrial and DIY applications, including paint stripping, plastic welding, and adhesive softening. Equipped with variable temperature settings, it allows for precise control between 100°C and 550°C to suit various materials. Its ergonomic design ensures comfortable handling during extended use, while included nozzle attachments provide versatility for specialized tasks.

Technical Specifications

Minimum Temperature	100 °C
Maximum Temperature	550 °C

Features

Design Features

- Variable temperature control
- Ergonomic handle
- Multiple nozzle attachments

Key Applications	Paint Stripping, Shrink Tubing, Plastic Welding, Adhesive Softening, Drying
