

Gasoline Dispensing Pump

This gasoline dispensing pump is designed for dispensing gasoline. It is used in petrol service stations to accurately pump fuel.

Product Overview

High-Performance Gasoline Dispensing Solution

This industrial-grade gasoline dispensing pump is engineered for reliable, high-volume fuel transfer operations. Designed to meet the rigorous demands of commercial fueling facilities and industrial processing plants, it ensures consistent performance and durability. Its robust construction and precise mechanical components make it an essential asset for efficient fuel management.

Technical Specifications

Flow Rate

50 L/min
Standard Flow

80 L/min
High Flow

Power Supply

220V / 380V AC

Compatible Fuels

Gasoline, Diesel, Kerosene

Compliance & Safety

Certifications

ISO 9001 • CE Certified • ATEX Compliant

Operational Features

Key Features

- Precision flow metering
- Automatic nozzle shut-off
- Corrosion-resistant internal piping
- Integrated emergency stop system
- Weatherproof housing
