

Gasoline Engine

This gasoline engine is designed for various applications requiring a dependable power source. It features robust construction and efficient combustion for reliable power output.

Overview

High-Performance Gasoline Engine

This gasoline engine is engineered for demanding applications, offering robust construction and efficient combustion for reliable power output. Designed with durability in mind, it features easy starting mechanisms and low fuel consumption to ensure operational efficiency. It serves as an ideal power source for generators, water pumps, and various equipment requiring consistent performance in power transmission and distribution.

Technical Specifications

Rated Power

25 HP

Power Output

Engine Displacement

708 cc

Features

Key Features

Easy Starting, Low Fuel Consumption, Durable Components, High Performance

Applications

Primary Applications

- Generators
- Water Pumps
- Electric Power Transmission
- Distribution Equipment
