

Gasoline Engine (291-420cc)

This gasoline engine provides a versatile power source for diverse applications. Available in 291cc, 306cc, 369cc, 414cc, and 420cc displacements, it features a durable design and efficient combustion for reliable performance.

Overview

Versatile Power Solutions

This series of high-performance gasoline engines provides a robust and reliable power source for a wide range of industrial and commercial applications. Featuring an Overhead Valve (OHV) design for enhanced efficiency, these engines are engineered for demanding environments such as power generation, water pumping, and heavy-duty equipment operation. With multiple displacement options available, they offer scalable power output to meet diverse operational requirements.

Technical Specifications

Available Displacements	291cc, 306cc, 369cc, 414cc, 420cc
Engine Design	Overhead Valve (OHV)

Features

Operational Controls

- Fuel control lever
- Safety shut-off switch
- Air filter assembly

Compliance & Quality

Emission Standard Compliant • Commercial Series

Starting System	Manual Recoil Start
