

Gasoline Engine (306cc, 369cc, 420cc)

This gasoline engine is designed for power generation applications. It is available in 306cc, 369cc, and 420cc displacements.

Product Overview

High-Performance Gasoline Engines

These high-performance gasoline engines are engineered for reliable power generation across demanding industrial applications. Available in 306cc, 369cc, and 420cc displacement options, they are designed for durability and efficient combustion. They serve as ideal power sources for generators, water pumps, and various heavy-duty industrial machinery.

Technical Specifications

Starting Mechanism

Electric Start

Available Displacements	306cc, 369cc, 420cc
Rated Load Speed	7500 R.P.M.
Maximum Ambient Temperature	40 °C
Output Voltage	12VAC

Applications

Suitable For

- Generators
- Water Pumps
- Industrial Machinery

Operational Safety

Usage Warnings

- Do not use in rain
- Do not crack for 15 minutes
- Grounded Cordset required
- Indoor or outdoor use (if grounded)

Duty Cycle

Intermittent Duty Only
