

Gasoline Engine 5.5 HP

The Kaito GX160 is a 5.5HP gasoline engine designed for a variety of applications. It features a durable construction and efficient performance, making it suitable for powering small machinery and equipment.

Product Overview

Reliable Power Solution

This 5.5 HP gasoline engine is engineered for consistent performance across a wide range of small machinery applications. Built with durability in mind, it offers reliable operation and ease of use for demanding tasks. Its efficient design ensures steady power output, making it an ideal choice for equipment requiring dependable mechanical drive.

Technical Specifications

Power Output

5.5 HP

Horsepower

Ignition Type

Electronic Ignition

Model Series

GX160

Features

Key Features

Gasoline Powered, Electronic Ignition, Durable Construction, High Efficiency
