

Gasoline Engine 5.5 HP

This gasoline engine is compact and powerful, designed for a variety of applications. It features 5.5 horsepower output and durable construction for reliable performance.

Overview

Compact and Powerful Performance

This 5.5 HP gasoline engine is engineered for versatility and reliability in demanding environments. Designed as a compact power source, it is ideal for integration into generators, water pumps, and various small machinery applications. Its durable construction ensures consistent performance, while the electronic ignition system provides dependable starting and operation.

Technical Specifications

Power Output

5.5 HP

Horsepower

Ignition System

Electronic Ignition

Engine Type

Gasoline Engine

Model Designation

GX160

Applications

Compatible Equipment

- Generators
- Water Pumps
- Small Machinery
