

Gasoline Engine 6.5 HP 196cc

This gasoline engine delivers 6.5 horsepower with a 196cc displacement. It is equipped with an easy start recoil system, forced air cooling, and a low oil shutdown feature.

Overview

High-Performance 196cc Gasoline Engine

This powerful 6.5 HP gasoline engine is engineered for reliability and efficient performance across a wide range of industrial applications, including generators and water pumps. Featuring durable construction and a forced air cooling system, it is designed for long-lasting operation and ease of maintenance. The unit also offers versatile fuel options with LPG compatibility and includes safety features like a low oil shutdown system.

Technical Specifications

Maximum Power

6.5 HP

Max Power

Displacement	196 cc
Cooling System	Forced Air

Features

Starting System	Easy Start Recoil
Safety Features	Low Oil Shutdown, Durable Construction

Compatibility

Fuel Compatibility

Gasoline • LPG

Applications

Suitable For

- Generators
- Water Pumps
- General Machinery
