

# Gasoline Engine Air Compressor

This portable air compressor is powered by a gasoline engine. It is suitable for various pneumatic applications requiring on-site compressed air.

## Overview

### High-Performance Portable Air Compression

This portable air compressor is engineered for demanding on-site pneumatic applications, offering reliable performance without the need for an external power source. Featuring a robust gasoline-powered engine and a twin-cylinder system, it delivers consistent compressed air pressure for various industrial and construction tasks. Designed with mobility in mind, the unit includes integrated wheels and a pressure regulator, making it an essential tool for field operations where electricity is unavailable.

## Technical Specifications

Engine Type	Gasoline
Engine Power	5.5 HP
Cylinder Configuration	Twin Cylinder

## Features

### Included Components

- Gasoline Engine
- Twin Cylinders
- Air Tank
- Pressure Regulator
- Mobility Wheels

Mobility Features	Wheeled Chassis, Portable Design, On-site Ready
Control System	Yes
