

Gasoline Engine Concrete Vibrator on Wheeled Cart

This portable concrete vibrator features a gasoline engine and is mounted on a wheeled cart for easy transport. It utilizes a flexible shaft and vibrating poker to consolidate concrete in various construction applications.

Product Overview

High-Efficiency Concrete Consolidation

This portable gasoline engine concrete vibrator is designed for professional construction environments requiring reliable, high-performance concrete consolidation. Mounted on a heavy-duty wheeled cart, the unit offers exceptional maneuverability across job sites. Its robust design incorporates a flexible shaft and vibrating poker to ensure uniform density and eliminate air pockets in concrete pours.

Technical Specifications

Core Components

- Gasoline Engine
- Flexible Shaft
- Vibrating Poker
- Wheeled Carriage

Engine Type	Gasoline
Mobility	Wheeled Cart, Portable, Easy Maneuverability

Application

Industry Application

Construction • Infrastructure • Concrete Works
