

Gasoline Engine Driven Water Pump

This gasoline engine driven water pump is designed for irrigation and drainage. It is a self-priming centrifugal pump suitable for various water pumping needs.

Product Overview

High-Efficiency Gasoline Water Pump

This gasoline engine-driven water pump is engineered for reliable performance in irrigation, drainage, and industrial water transfer applications. Featuring a robust self-priming centrifugal design, the unit is mounted on a durable metal frame to ensure stability during operation. It is an ideal solution for remote locations or areas requiring high-mobility liquid handling capabilities.

Performance Metrics

Pump Type	Self-priming centrifugal
Primary Applications	Irrigation, Drainage, Water Transfer

Physical Build

Construction Details

- Green-painted pump housing
- Red and black engine assembly
- Integrated air filter
- Dedicated fuel tank

Frame Material	Black metal frame
