

Gasoline Engine High-Pressure Cleaning Machine

This high-pressure cleaning machine is powered by a gasoline engine for reliable performance. It is mounted on a wheeled frame, making it easy to move around for various cleaning tasks.

Product Overview

Industrial Cleaning Power

This high-pressure cleaning machine is powered by a reliable gasoline engine, designed for heavy-duty cleaning tasks in demanding environments. Mounted on a robust wheeled frame, it offers excellent portability for industrial and outdoor use. With a focus on performance, this unit delivers consistent pressure to tackle tough grime and debris efficiently.

Technical Specifications

Rated Pressure

1000 PSI
Max Pressure

Flow Rate

1.5 GPM
Water Flow

Model Number

JDCM-240

Features

Power Source

Gasoline Engine

Portability

- Wheeled frame for easy mobility
- Compact design
- High-pressure hose included
- Spray wand included
