

Gasoline Engine High Pressure Washer

This high-pressure washer is a robust and powerful machine designed for demanding cleaning tasks. Its gasoline engine provides mobility and independence from electrical power sources.

Overview

High-Performance Gasoline Pressure Washer

This high-pressure cleaner is a robust and powerful machine engineered for demanding cleaning tasks in industrial and commercial environments. Powered by a reliable gasoline engine, it offers complete mobility and independence from electrical power sources. The unit is built on a sturdy frame with large wheels, ensuring easy maneuverability across various terrains, while the integrated control panel allows for precise pressure and flow management.

Technical Specifications

Model Identifier	3WZ-180-160
Power Source	Gasoline Engine
Suitable Applications	Industrial, Commercial, Heavy-duty Residential

Design Features

Mobility

- Sturdy frame construction
- Large wheels for varied terrain
- Portable gasoline-powered design

Control Interface

Pressure Control • Flow Control • Integrated Gauges
