

Gasoline Engine Plate Compactor

The gasoline engine plate compactor is a robust machine designed for soil and asphalt compaction. It delivers high-frequency vibrations to effectively consolidate granular materials.

Overview

High-Performance Compaction

The gasoline engine plate compactor is a robust and efficient machine engineered for reliable soil and asphalt compaction. Powered by a dependable gasoline engine, it utilizes high-frequency vibrations to effectively consolidate granular materials for stable foundations. With a durable steel base plate, this equipment is an essential asset for construction, landscaping, and road maintenance projects requiring maneuverability and ease of use.

Certifications & Standards

Compliance Standards	CE, GS
----------------------	--------

Technical Specifications

Suitable Applications

- Soil compaction
- Asphalt compaction
- Road maintenance
- Landscaping

Power Source	Gasoline Engine
