

Gasoline Engine Screw Air Compressor

This screw air compressor is powered by a reliable Honda GX390 gasoline engine. The unit is designed for efficient air compression and mounted on a sturdy baseplate for stability.

Overview

High-Performance Gasoline Engine Compressor

This gasoline engine-powered screw air compressor is engineered for reliability and industrial-grade performance. It features a robust engine known for its power output and stability in demanding environments. Designed for efficient air compression, this unit includes integrated filtration and sound-dampening systems to support consistent operation across various industrial applications.

Technical Specifications

Key Components

- Air filter system
- Oil filtration unit
- Muffler system
- Heavy-duty baseplate

Engine Type	Honda GX390
--------------------	-------------

Features

Design Advantages

Noise Reduction • Stable Mounting • Reliable Engine

Suitable Environments	Industrial, Construction, Field Work
