

Gasoline Forward Plate Compactor

This forward plate compactor is a robust machine designed for soil compaction and asphalt preparation. It delivers high impact force for effective compaction in road construction, landscaping, and foundation work.

Product Overview

High-Performance Compaction

This gasoline-powered forward plate compactor is engineered for efficient soil compaction and asphalt preparation. Designed for durability and ease of use, it features a robust steel base plate and a sturdy frame capable of handling demanding road construction, landscaping, and foundation projects. Its compact design allows for excellent maneuverability in confined spaces, ensuring consistent results across various job sites.

Key Features

Transportation & Storage

- Foldable handle for easy transportation
- Built-in wheels for convenient mobility

Operator Comfort

Yes

Vibration Reduction System

Heavy-duty mounts reduce vibration to the upper engine and handle, enhancing operator comfort.
