

Gasoline Generator

This gasoline generator provides uninterrupted, quality electrical power. It features a large-capacity fuel tank and noise-dampening mufflers.

Overview

Reliable Power Solution

This gasoline generator is engineered to provide uninterrupted, high-quality electrical power for diverse applications. Designed with durability and portability in mind, it features a robust protective frame suitable for both backup power during outages and reliable operation in remote locations where grid access is unavailable.

Technical Specifications

Rated Voltage

240 V

Voltage

Model Identifier

SH2900-II

Key Features

Key Features

- Convenient control panel for easy monitoring
- Uninterrupted quality electrical power output
- Large-capacity fuel tank for extended operation
- Noise-dampening muffler system
- Integrated circuit breaker for electrical safety

Application Suitability

Backup Power, Remote Locations, Portable Use
