

Gasoline Generator

This gasoline generator provides reliable portable power. It delivers both AC power through standard outlets and DC power for battery charging.

Product Overview

Reliable Portable Power

This gasoline-powered generator is designed to provide consistent and reliable electricity for off-grid applications. Engineered with a robust engine and a durable protective frame, it ensures steady performance during operation and safe transport. The unit features a user-friendly control panel equipped with essential monitoring tools, making it a dependable solution for various power needs.

Key Features

Core Advantages

- Convenient Control Panels
- Uninterrupted Quality Electrical Power
- Large-Capacity Fuel Tank
- Noise-Dampening Mufflers

Technical Specifications

AC Output Voltage	400 V
DC Output Current	8.3 A
DC Output Voltage	12 V
Monitoring Tools	Hour Meter, Voltmeter, Circuit Breaker
