

Gasoline Generator for Electric Power Transmission

This gasoline generator is designed for electric power transmission and distribution. It features a robust frame, a fuel tank, and various electrical outlets and controls.

Product Overview

Professional Power Solutions

These portable gasoline generators are engineered for high-performance electric power transmission and distribution. Equipped with advanced features like automatic voltage regulators (AVR), large-capacity fuel tanks, and low-oil alerts, they ensure safe and reliable operation. Designed for efficiency, they offer low noise, low vibration, and long service life, making them ideal for demanding professional applications.

Technical Specifications

Model Specifications

Model	Rated Output (kW)	Max Output (kW)	Fuel Tank (L)	Net Weight (kg)
EP1500/1500es	1/1.2	1.2/1.5	4	28/30
EP2500/2500es	2.0/2.3	2.2/2.5	15	42/44
EP3000/3000es	2.5/2.8	2.8/3.0	15	46/48
EP6500/6500es	5.0/5.5	5.5/6.0	25	85/87
EP8000/8000es	6.5/7.2	7.0/8.0	25	86/88

Electrical Standards

- Rated Voltage: 120V, 220V, 230V, 120/240V
- Rated Frequency: 50/60Hz

Features & Compliance

Certifications & Compliance

CE • EMC • Euro II • Noise Identification

Core Features

AVR Automatic Voltage Regulator, Large Capacity Fuel Tank, Non-fuse Breaker, Low Oil Alert, Portable Design, Low Consumption, Low Noise, Low Vibration
