

Gasoline Generator SH2900-I

The gasoline generator provides uninterrupted quality electrical power. Its control panels are designed for convenient operation.

Overview

Reliable Portable Power Solution

The SH2900-I gasoline generator is engineered to provide consistent and uninterrupted electrical power for various portable applications. Designed with a focus on durability and ease of use, it features a robust frame for enhanced protection during transport and operation. The integrated control panel simplifies management, offering both AC and DC output options with built-in circuit protection for added safety.

Technical Specifications

| | |
|-------------------|----------------------|
| AC Output Voltage | 220V |
| Output Types | AC Output, DC Output |

Features

Key Features

- Convenient control panels
- Uninterrupted quality electrical power
- Large-capacity fuel tank
- Noise-dampening mufflers
- Circuit protection
