

Gasoline Generator with Welder

This gasoline generator with welder features a robust design. It operates at 50Hz and includes an AVR (Automatic Voltage Regulator).

Overview

Professional Dual-Purpose Power Solution

This gasoline generator with integrated welder provides a robust and versatile solution for job sites requiring both portable power and welding capabilities. Engineered for reliability, the unit features an Automatic Voltage Regulator (AVR) to ensure stable power output for sensitive equipment. Designed with mobility in mind, the generator includes durable wheels and a handle bar, making it easy to transport across various work environments.

Technical Specifications

Frequency	50 Hz
Voltage Regulation	AVR (Automatic Voltage Regulator)

Features

Mobility Features

- 10-inch wheels
- Handle bar for transportation

Starting System	Easy Electric Start
