

Gasoline Plate Compactor

This gasoline plate compactor features a folding handle for easy transportation and storage. The open plate provides self cleaning.

Product Overview

Professional Compaction Solution

The QTP9765 Gasoline Plate Compactor is a robust and efficient machine designed for soil, gravel, and asphalt compaction in various construction and landscaping applications. It features a powerful 6.5HP gasoline engine and a durable steel base plate, ensuring optimal performance and consistent results in demanding job site conditions. The unit is engineered for operator comfort with a vibration-dampening system and a convenient folding handle for easier transportation and storage.

Performance Metrics

Key Performance Metrics

25000 N

Centrifugal Force

35 cm

Compaction Depth

32 m/min

Travel Speed

Technical Specifications

Machine Specifications

Feature	Specification
Model	QTP9765
Plate Size	582 x 518 mm
Engine Displacement	196 cc
Engine Power	6.5 HP
Operating Weight	103.0 kg
Exciter Speed	5500 vpm

Design & Features

The QTP9765 features a durable design with optional kits available for specialized tasks like asphalt compaction and delicate paving work.

Design Advantages

- Folding handle for easy transportation and storage
- Open plate design provides self-cleaning capability
- Sealed belt cover to prevent sand and soil ingress
- Low vibration system for reduced operator fatigue
- Gasoline power system for high compaction force

Optional Accessories

Water Sprinkler Kit, Paving Pad Kit
