

Gasoline Plate Compactor

This gasoline plate compactor features a folding handle for simplified transport and storage. Its open plate design facilitates self-cleaning.

Product Overview

High-Performance Compaction

This gasoline-powered plate compactor is engineered for superior compaction efficiency in construction and landscaping projects. Featuring a robust gasoline engine and a self-cleaning open plate design, it delivers high force while maintaining low vibration levels for operator comfort. Its compact, foldable handle design ensures that storage and transportation are effortless, making it an ideal choice for professional site preparation.

Technical Specifications

Technical Specifications

Specification	Value
Model	QTP9742
Plate Size	580x433 mm
Engine Displacement	163 cc
Engine Power	5.5 HP
Operation Weight	72.5 kg

Design Features

The QTP9742 features a durable steel base plate and ergonomic handle design for professional compaction tasks.

Key Design Features

- Folding handle for convenient storage and transport
- Open plate design allows for self-cleaning operation
- Sealed belt cover protects internal components from sand and soil
- Low vibration system for improved operator comfort

Available Accessories

Water Sprinkler Kit, Paving Pad Kit
