

Gasoline Plate Compactor

This plate compactor is designed for soil and asphalt compaction in construction and landscaping. It delivers high impact force and includes a durable steel base plate and foldable handle for easy transport.

Overview

Professional Compaction Performance

This gasoline plate compactor is engineered for reliability, portability, and ease of maintenance in demanding construction environments. It features a robust design capable of compacting a variety of materials including sandy soil, gravel, asphalt, and concrete. Whether working on building foundations, road repairs, or railway projects, this equipment delivers the consistent performance required for professional-grade results.

Key Features

Operational Benefits

- Simple structural design
- Portable and easy to operate
- High reliability
- Convenient maintenance

Suitable Applications

Sandy Soil, Gravel, Asphalt, Concrete, Foundation Repair, Road Construction, Railway Maintenance

Model Variants

Model Specializations

Model	Specialization
HZR70T	Asphalt (includes water tank)
HZR70P	Brick ground (includes PU plate)
