Product Overview

High-Performance Soil Compaction

This gasoline-powered plate compactor is engineered for superior compaction performance in both forward and reverse directions. It is an ideal solution for handling sand, gravel, and mixed soils, particularly in narrow trenches or along foundations and walls. Designed for durability and ease of maintenance, the unit features a robust ductile iron base plate and a user-friendly open design for self-cleaning.

Key Features

Key Advantages

- Forward and reverse compaction capability
- Ductile iron base plate for enhanced durability
- Open plate design for easy self-cleaning
- Easy-remove water tank with integrated valve
- Radius base plate for corner access
- Centrally located lifting bar for transport
- Sealed belt cover to prevent debris ingress

Technical Specifications

Engine Power

5.5 HP

Power Rating

Engine Compatibility

Honda GX Series, Lifan 168F

Applications

Suitable Materials

Sand • Gravel • Mixed Soils • Asphalt • Granular Materials
