

Gasoline Powered Agricultural Spray Machine

This agricultural spray machine is designed for efficient spraying applications. It features a gasoline-powered engine and is mounted on a wheeled cart for easy maneuverability.

Overview

Professional Agricultural Spraying Solution

The CAZ-301 is a gasoline-powered agricultural spray machine engineered for high-performance spraying tasks in demanding agricultural environments. Designed for efficiency and mobility, this unit is mounted on a robust wheeled cart to ensure easy maneuverability across diverse terrain. It features an integrated hose reel for streamlined operation and consistent pressure output, making it a reliable tool for professional crop protection.

Technical Performance

Key Performance Metrics

30 L/min

Suction Capacity

5 mpa

Max Pressure

4 kw
