

Gasoline Powered Backpack Sprayer

This backpack power sprayer is equipped with a gasoline engine for efficient spraying in agricultural applications. Designed for portability and ease of use, this sprayer is suitable for pest control, fertilization, and other crop management tasks.

Product Overview

Professional Backpack Power Sprayer

This gasoline-powered backpack sprayer is engineered for efficient liquid application in agricultural and landscaping environments. Designed for optimal portability, it allows operators to cover large areas with ease for tasks such as pest control and fertilization. The integrated pump system ensures consistent pressure, while the ergonomic backpack design supports extended use during crop management.

Key Features

Primary Applications	Pest Control, Fertilization, Crop Management, Agricultural Spraying
Model Number	3WZ-708

Technical Specifications

Design	Backpack • Portable
Power Source	Gasoline Engine

Components

- Included Components
- Liquid Tank
 - Pressure Pump
 - Spray Wand
 - Gasoline Engine
