

Gasoline Powered Backpack Sprayer

This backpack power sprayer is designed for efficient application of liquids in agricultural settings. It features a gasoline engine, a durable tank, and an adjustable nozzle for precise spraying.

Overview

Professional Backpack Power Sprayer

This gasoline-powered backpack sprayer is engineered for high-efficiency liquid application in agricultural and horticultural environments. Designed with a durable tank and a powerful engine, it ensures reliable performance for pest control, fertilization, and crop management tasks. The inclusion of an adjustable nozzle allows for precise spraying, making it an essential tool for professional crop care.

Key Metrics

Power Source

Gasoline Engine

Model Number

3WZ-800

Primary Applications

Pest Control, Fertilization, Crop Management

Design Features

Design & Utility

- Backpack ergonomic design
- Durable liquid tank
- Adjustable nozzle for precise application
