

Gasoline Powered Brush Cutter

This professional-grade brush cutter features a powerful engine for efficient cutting and trimming. It is ideal for clearing dense vegetation, overgrown grass, and tough weeds in gardens, lawns, and landscapes.

Overview

High-Efficiency 4-Stroke Brush Cutter

This professional-grade brush cutter features a revolutionary 4-stroke engine designed for compact, low-maintenance operation. By optimizing the start-up structure and engine efficiency, this unit delivers 1.25kW of power from a 34cc displacement, matching the performance of larger 43cc 2-stroke engines. It offers exceptional fuel economy and low emissions, making it an environmentally conscious and reliable tool for clearing dense vegetation and tough weeds.

Technical Specifications

Engine Type	4-stroke gasoline engine
Emission Standards	US Compliant, EU Compliant, China Compliant
Emission Value	30 g

Features

Key Advantages

- Compact and lightweight structure
- Easy-start optimization
- Oil tank removed for easier maintenance
- Stable operation even when flipped
- Compatible with brush cutter, pruner, and hedge trimmer attachments
