

Gasoline Powered Brush Cutter

This gasoline brush cutter is designed for demanding landscaping tasks. It features a powerful gasoline engine for efficient cutting through thick vegetation.

Overview

Professional Performance

This high-performance gasoline brush cutter is engineered for demanding landscaping tasks and efficient vegetation management. It features a robust engine design paired with an ergonomic U-type handle system to ensure comfort and control during extended operation. The versatile cutting system includes both a nylon spool and a durable blade, making it suitable for a wide range of trimming and clearing applications.

Design & Ergonomics

Ergonomic Features

U-type handle • Comfort-focused design • Convenient operation
