

Gasoline Powered Chain Saw for Wood Cutting

This gasoline-powered chain saw is designed for cutting wood. It is suitable for felling trees, limbing, and cutting firewood.

Product Overview

Professional Gasoline Chain Saw

This gasoline-powered chain saw is engineered for efficient wood cutting, providing the power and mobility required for forestry and landscaping tasks. It features a robust engine housing and a high-performance guide bar, making it suitable for felling trees, limbing branches, and preparing firewood. Designed with ergonomics in mind, the handle ensures precise control and comfort during extended operation.

Technical Specifications

Key Design Features

- High-performance guide bar
- Rotating chain system
- Ergonomic control handle
- Durable engine housing

Power Source	Gasoline
Primary Applications	Tree Felling, Limbing, Firewood Preparation
