

Gasoline Powered Chainsaw

This gasoline chainsaw is available with engine displacements of 38cm³, 45cm³, and 52cm³. It features adjustable oil filters and Oregon saw chains.

Overview

Professional Gasoline Chainsaw Series

This series of high-performance gasoline chainsaws is engineered for versatility and power, offering three distinct models to suit various cutting requirements. Featuring reliable engine displacements ranging from 38cm³ to 52cm³, these tools are designed for efficient operation with an operating speed range of 6,000 to 10,000 rpm. Equipped with premium components like Walbro carburetors and Oregon saw chains, these chainsaws ensure durability and precision. Each unit includes advanced features such as low-vibration handling, easy-off filter covers, and adjustable oil filters for simplified maintenance and user comfort.
