

Gasoline Powered Chainsaw for Wood Cutting

This gasoline-powered chainsaw is designed for both professional and home use. It features a high-performance engine, a durable cutting bar, and a comfortable ergonomic design.

Product Overview

Professional Performance in a Versatile Package

The YD-KW-38 is a robust gasoline-powered chainsaw engineered for both professional forestry tasks and demanding home wood-cutting projects. It features a reliable 37.2cc engine combined with an ergonomic design to ensure user comfort during extended operation. Integrated safety systems, including a chain brake and throttle lock, provide essential protection for the operator.

Technical Specifications

Engine Displacement	37.2 cc
