

Gasoline Powered Chipper Shredder

This chipper shredder is designed for processing garden waste, branches, and other organic materials. Powered by a gasoline engine, it efficiently reduces materials into manageable mulch or compost.

Product Overview

Professional Grade Chipper Shredder

This robust 2-in-1 chipper shredder is designed for high-efficiency processing of garden waste, branches, and organic materials. Powered by a high-performance 13HP gasoline engine, it offers reliable operation for both residential and commercial landscaping tasks. With its versatile 2-way feed system and heavy-duty cutting mechanism, it ensures rapid reduction of debris into manageable mulch.
