Overview

High-Performance Field Cultivator

This gasoline-powered field cultivator is engineered for versatility and durability in agricultural settings. Featuring a 170 X series engine, it combines powerful force with low-noise operation, making it ideal for rotary tillage, ditching, and weeding. With user-centric designs like an adjustable handlebar system and a maintenance-free tire, this machine ensures comfortable, safe, and efficient soil preparation for small to medium-sized farms.

Engine & Performance

Engine Power

9.5 HP

Horsepower

Engine Series

170 X series

Operational Features

Handlebar Range	45-degree vertical, 360-degree horizontal
Shifting Location	Arm-rest frame
Safety Features	Anti-clutch patent design, Hand-off stop, Internal tooth anti-vibration handle

Construction & Durability

Gearbox Material	Cast-iron
Air Filtration	Oil-bathing air filter
Tire Type	Maintenance-free (no puncture/deformation)

Functions

Primary Functions

- Rotary tillage
- Ditching
- Weeding
